"Reproductive freedom" is an anomaly. Research at the Center Against Forced Abortions shows that 60% of America's abortions are coerced. They are coerced by the child's father, grandparents of the child, employers, and even by doctors. How often have we heard stories of a doctor strongly suggesting a baby be aborted because the baby would have so many medical issues making it difficult to care for or have a normal life, found out that the parents who chose to continue the pregnancy gave birth to a perfectly normal, healthy child. Protection against coercion should exist which would stop many abortions. —Priests for Life, Jan 2025
